

## A BRAND NEW ROAD AND ENTRANCE FOR THE CLUB!

At a press conference on March 20th in Cartagena, Paco Bernabe, the Murcia Regional Minister for Roads and Transport announced the €3.9m project will begin this coming October, 2015. The project also received the support of Pilar Barreiro Alvarez, the Mayor of Cartagena.

even has a pavement, perfect for those avid walkers amongst us. No excuses now!

The plan for a cycle lane will please many at the club, as sharing the road with so many pelotons is often frustrating, and sometimes a little nerve racking.

## A new Director of Golf arrives

The cycle lanes will run from the beginning of the road at Los Belones and join up with the cycle lanes past the West course on the road to Portman. The plan is for four new roundabouts, the first one will be at the restaurant Canela turn, the second at the entrance fountain by Coto Del Golf. The third is where the turn for the Spa is, and the last one is where the road turns back toward the club past the West course, in between the first green and the second tee. At each roundabout the cycle lane go under the road, so at no point should we ever see bicycles on our roads again, much safer for all of us.

Work is planned to begin in October and LMC SL are looking at building a new entrance to the club. We promise to let you know the minute we do!

The picture below is of the roundabout at the entrance to the Club by Coto Del Golf, the cycle lane is indicated in green with the pavement in orange, not the centre, that's just to show the roundabout!

**We are delighted to inform you all that LMC SL have brought Eduardo Ruiz to the Club as the new Director of Golf.**

**He will be responsible for the management and maintenance of the Golf Division.**

**Eduardo comes to La Manga Club with a vast knowledge of golf in Spain, previously having worked at La Quinta Golf Resort, Finca Cortesin and most recently the world renowned Valderrama.**

He is 35 years old and graduated in Golf Business Management, Sales & Marketing and Customer and Quality Services at Malaga University. He has consolidated experience in operations and golf management. His professional career has been always linked to Golf Resorts, where as you can see above he has held various positions of responsibility.

We all wish him well, but at this stage would ask that owners refrain from contacting him until an official line of communication can be properly established.

As you can see from the illustration taken from the actual plans of the new scheme, the proposed road is much wider. It has a separate track for cyclists and
